Please amend the Specification as follows:

Please replace the paragraph beginning on p. 13, line 9 with the following:

In S722, unlike S712 of Figure 4 [[12]], the verification system requests instrument information [[and or]] and/or customer information from the recipient of the instrument. In this example, the verification system may request that the automobile dealer enter, for example, the type of instrument and denomination and the customer's name and address. Processing then proceeds to S723.
